## Isolated Converters

### High-Reliability, Field Proven DC-DC Converters for Military/Avionics Applications

The MilQor<sup>®</sup> series of high-reliability DC-DC converters brings SynQor's field proven high-efficiency synchronous rectifier technology to the Military/Avionics industry. SynQor's innovative QorSeal<sup>®</sup> packaging approach ensures survivability in the most hostile environments. Compatible with the industry standard format, these converters operate at a fixed frequency, have no opto-isolators, and follow conservative component derating guidelines.

#### Hi-Rel Product Features

- ◆ Fixed switching frequency
- ◆ No opto-isolators
- ◆ Parallel operation with current share on MQFL
- ◆ Remote sense
- ◆ Clock synchronization
- ◆ Primary referenced enable
- ◆ Secondary referenced enable on MQFL
- ◆ Continuous short circuit and overload protection with auto-restart feature
- ◆ Input under-voltage and over-voltage shutdown
- ◆ Output voltage trim range (MQHL, MQHR & MQBL) +10% to -10%
- ◆ -55 °C to +125 °C Operating Temperature

#### In-Line Manufacturing Process

- ◆ AS9100 and ISO 9001 certified facility
- ◆ Full component traceability
- ◆ Temperature cycling
- ◆ Constant acceleration screening
- ◆ 24, 96, 160 hour burn-in
- ◆ Three level temperature screening

#### Qualification Process

- Hi-Rel series converters are qualified to:**
- ◆ MIL-STD-810 consistent with RTCA/DO-160
  - ◆ SynQor's First Article Qualification
    - consistent with MIL-STD-883
  - ◆ SynQor's Long-Term Storage Survivability Qual.
  - ◆ SynQor's on-going life test
  - ◆ SynQor's element evaluation for HB & ES Grade

#### Design Process

- Hi-Rel series converters are:**
- ◆ Designed for reliability per:
    - NAVSO P-3641 A guide
  - ◆ Designed with components derated per:
    - MIL-HDBK-1547 A
    - NAVSO P-3641 A

#### Specification Compliance

- Hi-Rel series converters (with Hi-Rel filter) are designed to meet:**
- ◆ MIL-HDBK-704
  - ◆ RTCA/DO-160 Section 16, 17, 18
  - ◆ MIL-STD-1275
  - ◆ DEF-STAN 61-5 (Part 6)/(5, 6)
  - ◆ MIL-STD-461
  - ◆ RTCA/DO-160 Section 22

#### Mechanical

- ◆ **QorSeal<sup>®</sup>** packaging
- ◆ Industry standard footprint for MQFL & MQME
- ◆ Multiple mounting configurations and lead form options
- ◆ Gold plated nickel barrier finish on an extruded aluminium case

# Hi-Rel™

EMI filters are available with passive components only, or with additional active circuitry that provides surge/spike suppression, soft start in-rush limiting, reverse-polarity protection, and enable signal pass-through. They also are available in standard and extended input voltage ranges.

## Hi-Rel™ EMI DC Filters

Model Number	Input Voltage		Output Current	Isolation Voltage (to case)	Maximum DC Resistance @ 125 °C	Differential-Mode Attenuation (@ 500 kHz)	Common-Mode Attenuation (@ 500 kHz)
	Continuous	Surge <sup>3</sup> (≤100ms)					
<b>Full Size</b>

<b>Half Size</b>							
MQHE-28-P	±40 V	±100 V	10 A	500 V	60 mΩ	>80 dB	>60 dB
MQHE-28E-P	±70 V	±100 V	10 A	500 V	60 mΩ	>80 dB	>60 dB
MQHE-270-P	±400 V	±500 V	1.0 A	500 V	450 mΩ	>50 dB	>60 dB

Note 1 - T and T6 filters feature enable pass-through, transient suppression, soft-start and reverse polarity protection circuitry in addition to passive filter components.

Note 2 - R filters feature reverse polarity protection circuitry in addition to passive filter components.

Note 3 - While the passive filters can withstand these long-duration surge voltages, the surge voltage will be passed to the filter's load. Care should therefore be taken to make sure that the load will also be able to withstand any applied surges. The transient suppression filters block surges of either polarity, as specified in their data sheets

Note 4 - Designed specifically to be matched with MQFL-270L DC-DC converters.

## Hi-Rel™ Screening

Screening Level	Consistent with MIL-STD-883	C-Grade (0 °C to +70 °C)	ES-Grade (-45 °C to +100 °C)	HB-Grade (-55 °C to +125 °C)
Element Evaluation		No	Yes	Yes
Internal Visual	Per IPC-A-610 Class III	Yes	Yes	Yes
Temperature Cycle	Method 1010	No	Condition B (-55 °C to +125 °C)	Condition C (-65 °C to +150 °C)
Constant Acc.	Method 2001 (Y1 direction)	No	500 g	Condition A (5000 g)
Burn-In	Method 1015	24hrs @ +125 °C	96hrs @ +125 °C	160hrs @ +125 °C
Final Electrical Test	Method 5005 (Group A)	+25 °C	-45 °C, +25 °C, +100 °C	-55 °C, +25 °C, +125 °C
External Visual	Method 2009	Yes	Yes	Yes
Construction			QorSeal®	QorSeal®

## Advancing The Power Curve®

Headquartered in Boxborough, Massachusetts, at the location of its manufacturing operations, SynQor is a privately owned U.S. AS9100 and ISO 9001 company. SynQor's converters feature a patented two-stage power topology that greatly improves efficiency and optimizes the power dissipated by the converter. With a design center in Dallas, Texas, and sales/marketing offices throughout the World, SynQor is the technology, quality and service leader for power conversion modules and systems.

SynQor's rugged DC-DC converters, AC-DC converters, filters and systems are designed for a wide range of industrial and military applications including those required to withstand harsh environments: railway and transportation systems, industrial motion control, information displays, factory automation, critical military and power generation systems.

The MilQor® series of Uninterruptible Power Supply units (UPS), Hi-Rel and Mil-COTS DC-DC converters and EMI filters brings SynQor's field proven high-efficiency synchronous-rectifier technology to the Military/ Aerospace industry.

## QorSeal Packaging

Our unique QorSeal® packaging approach provides a conduction-cooled mechanical assembly around an SMT constructed power circuit that is low-profile, light-weight, and shielded.
